

2024 IMPACT

HYSKY

2024 has been a transformative year for HYSKY Society, led by our mission to decarbonize aviation and aerospace with hydrogen.

From hosting the world’s premier hydrogen aviation conference to launching new educational programs, this year has reinforced HYSKY’s role as a thought leader and innovator in removing carbon from aviation and aerospace.

This summary captures the year's key programs and their impact

3300

HYSKY Monthly Viewers

50

People who gained jobs through HYSKY programs

49

Students certified in hydrogen aviation

| PROGRAMS | DETAILS | OUTCOME |
|---------------|---|--|
| HYSKY Monthly | Free hydrogen aviation webinars on 3rd Mondays | 12 webinars in 2024 (61 total), ~3,300 total viewers and 284 hours watched on hydrogen aviation |
| FLYING HY | In-person hydrogen aviation event held at Caesars Forum | Sparked 10 partnerships, 5 startups, and 50 job connections in the hydrogen aviation ecosystem |
| HYSKY Edu | 5-week, 10-class, 20-hour course co-hosted with AIAA | 49 participants trained in H2 fundamentals, aircraft design (fixed-wing and eVTOL), and infrastructure |
| H2Hub Summit | Half-day event focused on hydrogen production | 100 registrants gained insight into U.S. hydrogen hub development, infrastructure, and production |
| HYSKY Pod | Podcast with pilots & innovators driving zero-carbon flight | 1,600 views and 86 hours watched in 2024, amplifying voices advancing zero-carbon aviation |
